## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-37 and 47-58, drawn to a method of operating an enclosure, classified in class 705, subclass 1.
  - II. Claims 38-46, drawn to a storage device with a plurality of enclosures, classified in class 705, subclass 1.
  - III. Claims 59-90, drawn to a method of determining a delivery address, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the storage device with a plurality of carriers and a host system, does not require the use of any tracking numbers, keypads or barcode scanners. The subcombination has separate utility such as a stand alone enclosure not connected to a host system, it can open the lock without the need of the host system or the plurality of enclosures.

3. Inventions I (and II) and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I (and II) are drawn to enclosures where packages can be dropped off or picked-up. Invention III is drawn to a product delivery system with a delivery company identifier and determining a delivery address, it does not require the use of an enclosure, but instead claims a customer pick-up site or collection point. Invention I (and II) and III have different modes of operation.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention: If Group I is chosen above the following election must be made:

- a. Species A: Claims 1-10 are drawn to one independent and distinct species.
- b. Species B: Claims 11-22 are drawn to another independent and distinct species.
- c. Species C: Claims 23-29 are drawn to another independent and distinct species.
- d. Species D: Claims 30-37, and 47-58 are drawn to another independent and distinct species.

Art Unit: 3629

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Peter Eng on 3/1/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
